Design: Responsive Mobile Design

PROJECTS

House Marketplace URL: House Marketplace | *Personal Project* 07/2024

- A real estate marketplace is to find and list houses for sale or for rent and Connect with their landlords to the information.
- Implemented secure user sign in and sign up functionality, including Google OAuth for seamless login experience
- Designed and categorized property listings into "Sale" and "Rent" sections for better user navigation and searchability.
- Enabled users to create and update their own property listings, providing full CRUD (Create, Read, Update, Delete) operations.
- Incorporated Leaflet for displaying property locations on maps and utilized a geocoding API to convert addresses into latitude and longitude coordinates.

Todo App URL: Todo APP | *Personal Project* 08/2024

- Developed a dynamic and user-friendly Todo App using React, focused on managing tasks efficiently.
- The application features a form for task input and a responsive UI that displays the task list alongside.
- Implemented a modal view to provide detailed task information.
- Key functionalities include adding, and deleting tasks, with real-time updates to the UI. Ensured an intuitive user experience through clean design and smooth interactions.
