- Frontend Development

PROJECTS

Social Media App | [🔗](#) | [MERN stack](#)

Apr 2022 - Present

- Through social media websites, people can post anything related to their lives and talk with their friends.
- Social media features include posting images, following/unfollowing users, and sharing stories.
- FORMIK and Yup can help you build validated forms in React. FORMIK manages form state and submission, while Yup provides the validation schema and tools.
- The main technologies used to create a social media website are MongoDB, React Js, Node.js, and Express.js.
- To verify if the API is functional or not, use Postman.

Amazon Clone | [🔗](#) | [ReactJS](#)

Mar 2024 - Apr 2024

- The application includes a shopping cart, as well as options to log in or sign up, and a checkout process.
- We offer a diverse product selection and streamlined checkout for a professional shopping experience.
- I added the order component and clicking checkout redirects to the order list with the total amount.
- I used ReactJS and Firebase to create a user-friendly and scalable solution for an excellent user experience.
